WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

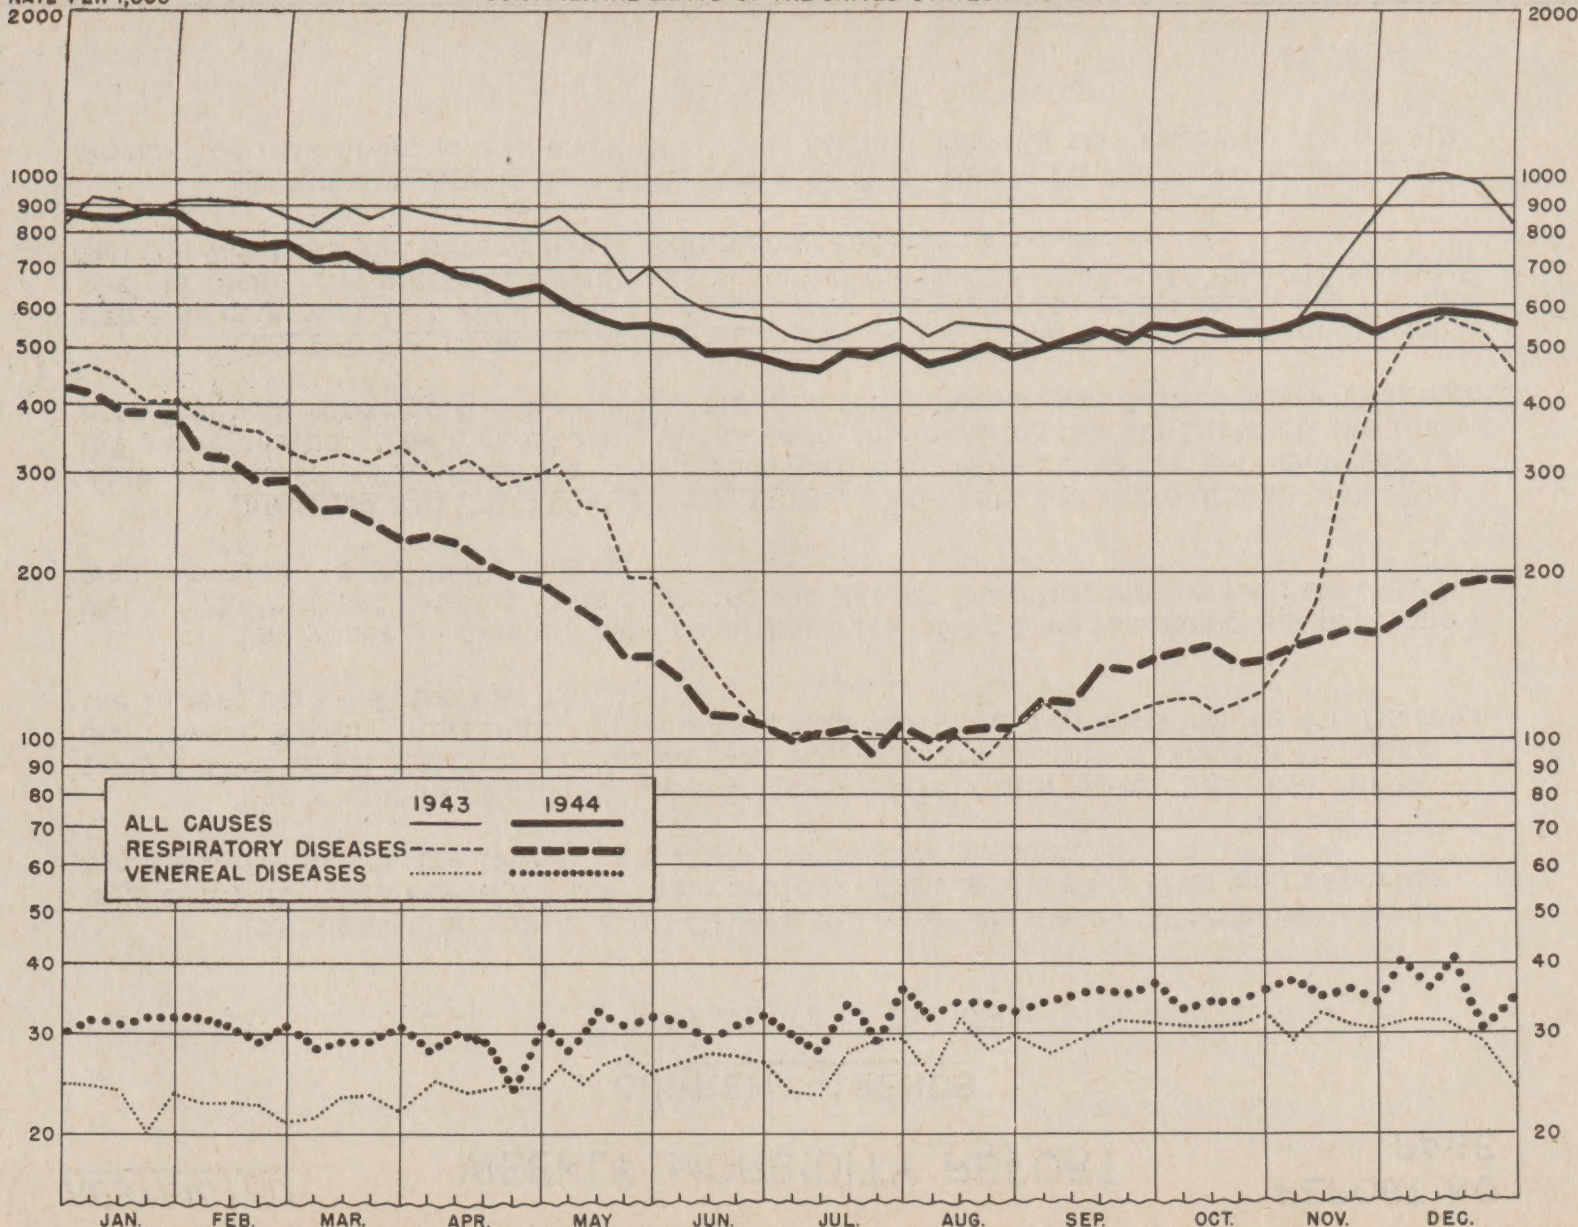

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES*, VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1943-1944

REPORT NO. 157
PAGE 2

RATE PER 1,000
2000

* INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

CURRENT TRENDS

Week Ending 30 Dec 1944

The admission rate for All Causes fell again this week. The curve stands well below the 1943 curve for the same period. The highest rate (710) was reported for the 5th District, the lowest rate (397) for the 7th District.

The respiratory disease rate dropped slightly this week. The 1944 curve turned down in all districts except the 5th, 9th, and 13th Districts, and the Potomac and Severn River Commands. The highest rate (354) was reported for the 5th District, the lowest rate (74) for the 7th District.

The venereal disease rate rose this week after a decided drop the previous week. The highest rate (52) was reported for the 8th District, the lowest rate (24) was reported for the 3rd District.

Influenza and Catarrhal Fever, Acute. The rate for these diseases declined again this week. The curve for 1944 stands well below the curve for 1942 and 1943 for the same period. The highest rate (211.51) was reported for the 5th District, the lowest rate (54) was reported for the 7th District and the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. The rate for these diseases remains the same as recorded last week. This rate is lower than the rate of the last week for the year of 1943. The highest rate (8) was reported for the 3rd District. The 7th District and the Potomac and Severn River Commands reported no cases.

Pneumonia, Atypical. After standing at the rate of 3 for three consecutive weeks, the rate dropped this week to 2. The highest rate (8) was reported for the 11th

CURRENT TRENDS .CONTD.

District. The 4th District and the Potomac and Severn River Commands reported no cases.

Tonsillitis and Pharyngitis, Acute. For the past six weeks, the rate for these diseases has gradually increased. Following the expected seasonal trend, the rate is now at the level of Jan. 8, of this year. The highest rate (141) was reported for the 13th District, the lowest rate (16) was reported for the 7th District.

Rheumatic Fever, Acute. The rate for this disease has stood at 2 for four consecutive weeks. The highest rate (21) was reported for the 13th District. The 4th and 7th Districts and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. The rate for this disease stands at 10 again this week. The 13th District reported the highest rate (30), while the Potomac and Severn River Commands reported the lowest rate (0.60).

Cerebrospinal Fever, Meningococcic. After a rise the previous week, the rate dropped this week. Only two Districts, the 5th and 9th, reported cases.

Malaria. The curve for this disease for this week shows a decided rise. The 1st District reported the highest rate (11), the 4th District the lowest rate (1).

Measles. The rate for this disease remains at 5. The highest rate (14) was reported for the 11th District. The 6th District reported no cases.

Poliomyelitis, Anterior, Acute. There were no poliomyelitis cases reported this week by Continental Shore Stations. The cumulative total of polio-

CURRENT TRENDS CONTD.

myelitis cases reported from all Continental Shore Stations Jan. 1, to Dec. 30, 1944 stands at 100.*

The U. S. Public Health Service reports for this week show the civilian cases in the five states with the highest incidence distributed as follows:

New York	30	Ohio	4
California	9	Washington	4
Illinois	5		

*Several of these cases were not reported on Weekly Morbidity Report NavMed 172.
